

# YASSMIN REDA ABDALAH

## Front-End Developer

[linked-In](#) | 01284371490 | [GitHub](#) | Cairo, Egypt | [yassminreda59@gmail.com](mailto:yassminreda59@gmail.com)

---

### SUMMARY

Front-End Developer passionate about building clean, responsive, and user-friendly web interfaces. Skilled in HTML5, CSS3, JavaScript (ES6+), React, and Bootstrap, with hands-on experience through multiple academic and personal projects. Strong foundation in Computer Science fundamentals including OOP, Data Structures, and Problem Solving using C++. Currently expanding knowledge in React and Node.js through advanced training programs.

---

### EDUCATION

Bachelor's in Computer Science (Expected 2027)

---

### WORK EXPERIENCE

#### Front-End Developer (Projects-Based) | 2025 – Present

- Developed 10+ responsive websites with HTML, CSS, JavaScript.
- Built interactive CRUD apps with dynamic DOM and Local Storage.
- Created React apps using functional components and hooks.
- Applied responsive design using Flexbox, Grid, and Bootstrap.

#### React Trainee – ITI | 2025

- Completed React fundamentals training; built small-scale component-based apps.
- Technical Member – GDG Community | 2025
- Assisted in workshops, coding sessions, and front-end support.

#### Trainee – Depi Initiative (React & Node.js) | 2025 – Present

- Learning advanced React, state management, and Node.js basics.
  - Working on practical full-stack projects.
- 

### PROJECTS

#### Interactive Website – HTML, CSS, JavaScript

- Built a fully responsive website using Flexbox and CSS Grid.
- Enhanced user interaction using JavaScript features.
- Ensured cross-browser compatibility and performance optimization.

#### 10+ Responsive HTML & CSS Projects

- Designed multiple landing pages and UI layouts.
- Applied modern CSS techniques and responsive design patterns.
- Followed clean UI structure and basic UX principles.

## **CRUD System – JavaScript**

- Built a complete CRUD application (Create, Read, Update, Delete).
- Implemented Local Storage for data persistence.
- Applied dynamic DOM manipulation for real-time UI updates.
- Structured code for maintainability and scalability.

## **React Website**

- Developed a component-based React application using functional components.
- Managed state using React hooks (useState, useEffect).
- Organized project structure following clean code practices.
- Implemented responsive design principles.

---

## **CERTIFICATES**

- React Training – ITI (2025).
- Technical Contributor – GDG Community (2026).
- Ongoing Training – Depi Initiative (React & Node.js) and currently working on a project for a startup company.

---

## **SKILLS**

### **Languages & Frameworks:**

- HTML5, CSS3, JavaScript (ES6+), React, Bootstrap.

### **Tools:**

- Git, GitHub, VS Code, Chrome DevTools.

### **Computer Science Fundamentals:**

- OOP, Data Structures, Problem Solving, C++.

### **Development:**

- Responsive Design.
- Mobile-First Development.
- DOM Manipulation.
- Component-Based Development.

### **Best Practices:**

- Cross-Browser Compatibility.
- Clean Code Structure.
- Basic UI/UX Principles.
